Inspection and Testing

Empower Energy Ltd carried out an electrical inspection and test at the Dolphin Centre, Poole. The works were carried out with no disruption to the Centre's normal activities and works were carried out overnight whilst the Centre was closed for high level works and dead testing. A full Schematic of the electrical layout was made to assist with future alteration works.

PANEL BOARD

Benefits

Planning regular periodic inspection and testing of an electrical installation will both develop safety and ensure legal compliance. It will protect people and staff from electric shock, protect property from damage caused by fire and heat arising from a defect, confirm that the installation is not damaged or deteriorated so as to impair safety, and identify any defects or non-compliance which may give rise to danger.

Furthermore, having regular tests professionally undertaken means that your insurance company will pay out in the event of a claim arising from an electrical fault or fire.

SWITCH ROOM

In a market often associated with pushy sales people and poor customer care, our attention to detail and honest approach constantly reinforces our good reputation. If you would like more information on our electrical services or would like to book a free, no-obligation survey please get in touch.
