

COMMERCIAL CASE STUDY:
Taylor Davis

LED LIGHTING

EFFICIENCY
PERFORMANCE
SAFETY

'TOMORROW'S GENERATION TODAY'

Taylor Davis

Taylor Davis, the **largest** supplier of Metal and Plastic Containers in the UK, chose Empower Energy to brighten up their business premises with a lighting overhaul. The Company reached this decision based both on **cost and performance** of the existing lighting system. The old Sodium charged lamps in the building were slow to start up and inefficient, as well as being high maintenance and expensive to run.

Empower Energy specified and installed a new lighting system, consisting of new LED Corn Lamps. The new lighting system is **instant** to start, **self-cooling, flicker free and maintenance free**.

The full installation was carried out with minimal disruption within three days and the results were clear to see.

Savings of 70%

Making this change not only created a **brighter** environment in which to work, it's estimated to reduce electrical consumption for lighting by 70%.

The business benefitted from instant cost savings as a result of the low energy consumption of the new system, great light, happy workers, professional looking workplace and ever important **green credentials!**

PAYBACK PERIOD

3.5 YEARS

(Approx -based on current rates)

In a market often associated with pushy sales people and poor customer care, our attention to detail and honest approach constantly reinforces our good reputation. If you would like more information on our lighting services or would like to book a free, no-obligation survey please get in touch.
