AGI Ltd, Poole

About the project

Aeronautical & General Instruments Ltd (AGI) commissioned Empower Energy to carry out the lighting to its new mezzanine area. AGI is an established British company, which manufacture a wide range of instruments and systems for the defence and civil markets around the world.

Solution

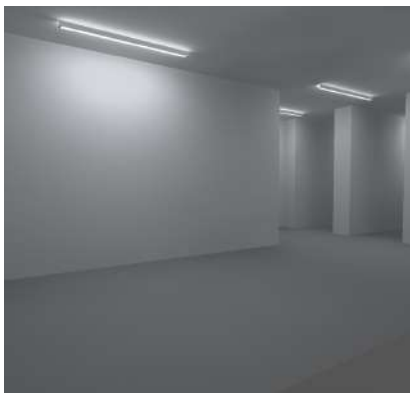

Using our in-house design team, we carried out a full 3D dialux design to ensure that the spread of light and lux levels were sufficient.

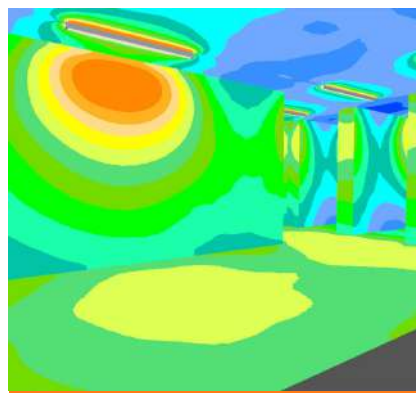

Ultra-efficient LED lighting was selected with integrated sensors to ensure that the aisles weren't left on whilst unoccupied. The new luminaires are designed for perfect light uniformity and durability. AGI are very pleased with the installation and results.
