Arrowedge Ltd, Bournemouth

About the project

Arrowedge were looking to improve and enhance working conditions in five pharmacies by replacing their existing lighting with the latest LED panel technology from Philips.

Solution

Using our in-house design team, we produced a full 3D simulation model to calculate a more ambient lighting level throughout the pharmacies.

The new lighting solution provided energy savings, reliability, flexibility and complied with the latest health & safety standards. Arrowedge took advantage of the Carbon Trust Green Business Fund to replace and upgrade the lighting in the pharmacies. Not only will this save him thousands on his lighting costs and greatly reduce the need to replace broken tubes but the project was awarded a 30% grant from the Carbon Trust Green Business Fund.

This will also improve the look of the premises with smart flicker free LED panels from Philips lighting. Gone are the days of seeing broken fluorescent tubes, now customers are greeted by a warm friendly ambiance combined with a clinical cleanliness.
