

COMMERCIAL CASE STUDY:
BH Live - BIC

TOMORROW'S GENERATION TODAY

EMPOWER
ENERGY

BIC, Bournemouth

Empower Energy are delighted to announce one of our largest flat roof top solar installations in Bournemouth. BH Live commissioned Empower Energy to design and install a 250KWp solar system on the (BIC) Bournemouth International Centre. The system was designed with SolarEdge technology to maximise generation. SolarEdge power optimisers are connected in each panel to increase energy output by constantly tracking the maximum power point of each module individually. The solar system is helping to enhance green credentials, reduce its electricity use and carbon footprint.
