

COMMERCIAL CASE STUDY:
Global Building Controls Ltd

TOMORROW'S GENERATION TODAY

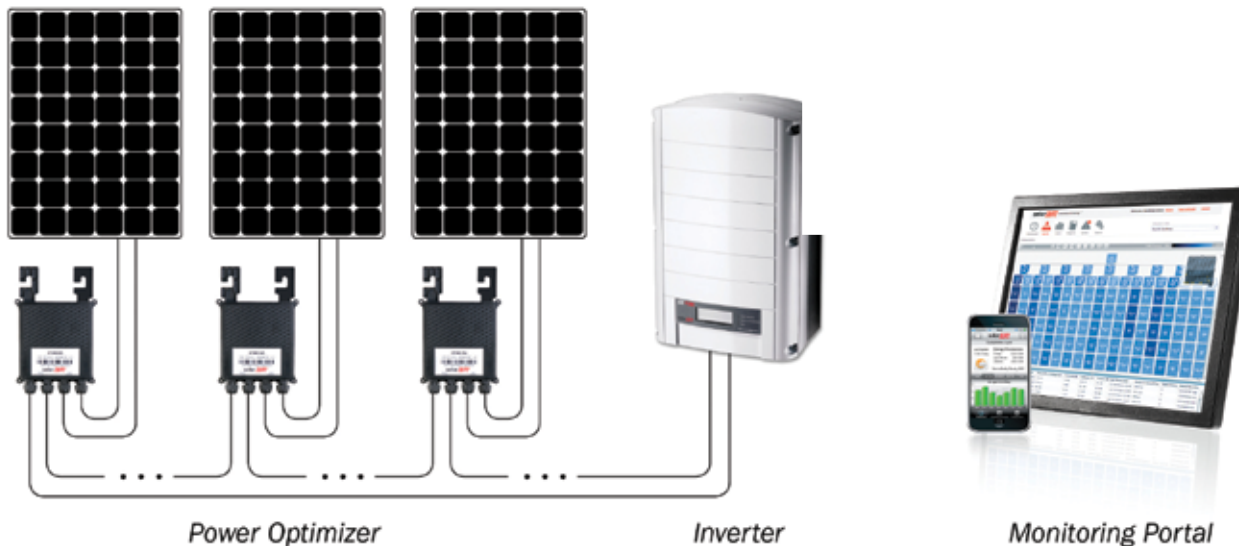

Global Building Controls Ltd

Global Building Controls Ltd are control system integrators for building management systems and are passionate about efficient energy and affordable heating, ventilation and climate controls within commercial buildings that are easy to use.

Practising what they preach, their office boasts an impressive **B48** energy performance rating thanks to all of their efficiency measures and solar PV system.

As we offered the Solaredge solution, which gives increased yield as well as online system monitoring down to an individual panel level, Empower Energy were the contractor of choice for their installation. So happy with the results, GBC are now looking to integrate this into their building management system solutions.

SolarEdge System
