

COMMERCIAL CASE STUDY:  
Hydraulic Projects Ltd

TOMORROW'S GENERATION TODAY

# Hydraulic Projects Ltd

Hydraulic Projects Ltd supply the world's leading autopilot manufacturers with hydraulic pumps, cylinders and valves of the highest quality for steering yachts and commercial craft up to 30 metres.

This system was interesting to design casting many challenges in the process and utilizes 4 roofs. The combination of the high powered Mage Panels and Power One Inverters will ensure a great yield and return on investment for our client today and for the next 20 years.

The installation was successfully completed in 5 days with a team of 6, despite a little snow!

The customer says –  
***“It looks great doesn't it. You did a fantastic job and I shall certainly be recommending your company to others.”***
