'TOMORROW'S GENERATION TODAY'

EMPOWER
ENERGY

Leathams, London HQ

Leathams, a prestigious high-end food supply company with over 30 years experience in delivering the best possible products and service, chose Empower Energy to install a 250kWp Solar PV System at its London headquarters.

This East and West facing split system provides a steady, continuous feed of 'free' electricity to the building which contains a large number of refrigeration units. The synergy of increased summertime usage of refrigerators and higher solar output makes Solar Power the optimal solution for an organisation with this type of requirement.

CONTROL CENTRE

Group Sales and Marketing Director, Clive Moxam said:

“This installation demonstrates Leathams commitment to sustainability, not only within our building developments but also within our own business practices. Helping the environment reflects positively on reputation whilst also reducing energy bills.”
