Tesla Powerwall 2

TOMORROW'S GENERATION TODAY

TESLA POWERWALL 2

MAXIMISE
SOLAR
ENERGY

Installation Capacity

Powerwall is a home battery that stores solar energy so you can use it day or night and self-power your home. Solar panels typically generate more clean energy than your house can immediately use. Powerwall stores that excess solar to make it available on demand, maximising your use of solar and reducing your reliance on the grid. Through the Tesla mobile app, you gain full visibility and control over your self-powered home.

Compact and simple to install, Powerwall 2 is a completely automated system that requires no maintenance. The Powerwall 2.0 has more than twice the energy storage capacity of the original version with 14 kWh capacity. Over double the capacity means double the ability to keep your home humming with guilt-free electric power.

Specifications:

Touch Safe - Touch safe for the entire family with no live wires or bulky vents.

Flexible Installation - Wall mounted or floor mounted, stack up to nine Powerwall units to power homes of any size.

Durable Design - Water resistant and dustproof enclosure for installation inside or outdoors.

Always Connected - Monitor your solar energy use in real-time and receive alerts when Powerwall is preparing for cloudy or severe weather.
