TOMORROW'S GENERATION TODAY

Frank's South Solar Array, Ringwood

Frank already knew that he wanted to have his solar installation carried out by a local company. Upon receiving positive recommendations from friends on their experience with Empower Energy, he was reassured that we were his supplier of choice.

Frank was extremely happy with the work ethic and quality of work our installation team displayed during his installation. Frank is very happy with the aesthetics of his solar panels and having quoted "I hardly notices panels".

Since we installed Frank's system at the end of December last year, the system has produced 1,570Kw's of power during the darkest months of the year! Frank has been putting his production to great use with his Eddi Power Diverter that we installed with his solar which has heated all the hot water from his immersion tank without the need of using any gas. After generating enough power for his hot water and house utilities, Frank still finds himself exporting power back to the grid.

SOLAR PV DESIGN

KEY FACTS

INSTALLED
December 2022

SIZE
5.46 KWP

PANEL
13 x Jinko 420kw

SOLAREGE
3.68Kw INVERTER
&
13 x S440 OPTIMISERS

PROJECTED OUTPUT
5,311 KWh / year

CO2 REDUCTION
2,956 Kg / year

ANNUAL ELECTRICITY
SAVINGS

£720

Enhance your
green credentials

Save you **£1000s**
every year

Protect against
rising fuel costs

In a market often associated with pushy sales people and poor customer care, our attention to detail and honest approach constantly reinforces our good reputation.

If you would like more information on how to become more energy efficient or would like to book a free, no-obligation survey to find out how much you could save then please get in touch.
