

DOMESTIC CASE STUDY

Alice's Solar Installation, Highcliffe

TOMORROW'S GENERATION TODAY

Alice's Solar Installation, Highcliffe

Alice was very interested in getting solar onto her property and wasn't afraid of doing her own research. After 2 years of researching Alice was very clued up on what she wanted and she had been speaking with solar companies and narrowed down her choice of supplier to be between ourselves and another company. The biggest part that drew Alice to us was how we conducted the site survey as "Ryan was very open and honest".

During the site survey Alice and Ryan discussed the how we proposed on fixing the panels to the roof. This was an issues as Alice's roof is made up of zinc so therefore she didn't want it to be punctured in any way while fixing the panels. To fix the panels down in this windy area we used standing seam fixings that will attach onto the seams of the roof opposed to piercing the zinc.

On the lead up to the installation Alice began to worry about the aesthetics of the panels. this was put to rest as once the panels were installed she could see that they fitted with the look of her property perfectly. Alice even quoted "Like a work of art".

Overall Alice had a very good experience with us.

SOLAR PV DESIGN

KEY FACTS

INSTALLED
January 2023

SIZE
7.56 KWP

PANEL
18 x Jinko 420w

SOLAREGE
3.68 Kw INVERTER
&
18 x S440 OPTIMISERS

PROJECTED OUTPUT
6,225 KWh / year

CO2 REDUCTION

3,464 Kg / year

ANNUAL ELECTRICITY
SAVINGS

£1,575

Enhance your
green credentials

Save you **£1000s**
every year

Protect against
rising fuel costs

In a market often associated with pushy sales people and poor customer care, our attention to detail and honest approach constantly reinforces our good reputation.

If you would like more information on how to become more energy efficient or would like to book a free, no-obligation survey to find out how much you could save then please get in touch.
